Continuation of 3. NOTE: The proposed amendments provide new limitations which change the scope of claims, requiring at least further search and consideration, and not materially simplifying or reducing the issues at hand. The limitation of a "pulverulent" powder coating is dramatically narrower in scope than previous claims; further the limitation of operating the radiator surface at 2000-3000K is new to the claims and require additional search. Cancellation of product claim 33 would render rejection of that claim moot.
